APPENDIX 6-B: UPLAND SPECIAL STATUS TERRESTRIAL VEGETATION AND WILDLIFE SPECIES

Special status species identified for consideration as part of the Draft EIS include:

- State-listed species for which the study area is within the species’ distribution
- Federally-listed species identified as relevant to the proposed project based on a search of the IPaC database

The upland terrestrial vegetation and wildlife special status species that could be present in the vicinity of the project area are listed in the following table. The potential for these species to be impacted in the study area are addressed in Chapter 6, Section 6.4, Potential Impacts on Terrestrial Vegetation and Wildlife. Special status marine birds are addressed in Section 6.5, Potential Impacts on Special Status Species.
